

ELEVATOR PITCH

I design systems that reduce work time by up to 40% through smart automation."

"I'm Cristian, a Systems Engineering student specialized in software development and web architecture. I build scalable and efficient systems using PHP, MySQL, and the MVC pattern, applying clean code principles and solid requirements analysis.

I transform manual processes into automated solutions that improve productivity and generate real value for users and organizations.

I'm currently working on projects that integrate backend logic with optimized user experiences — always focused on performance and maintainability.

What challenge in your business or project would you like to solve with technology today?"

ELEVATOR PITCH

“Imagina tener sistemas que no solo funcionan... sino que predicen fallas antes de que ocurran.”

Soy Cristian, estudiante de Ingeniería de Sistemas especializado en desarrollo de software y arquitectura web. Construyo sistemas escalables y eficientes usando PHP, MySQL y el patrón MVC, aplicando principios de código limpio y un análisis sólido de requerimientos. Transformo procesos manuales en soluciones automatizadas que aumentan la productividad y generan valor real para usuarios y organizaciones.

Actualmente trabajo en proyectos que integran la lógica del backend con experiencias de usuario optimizadas, siempre con un enfoque en rendimiento y mantenibilidad.

**Estoy listo para ayudar a tu empresa a optimizar procesos y mejorar resultados con tecnología.
¿Quieres que te muestre cómo?**

ELEVATOR PITCH

“Imagine having systems that not only work... but predict failures before they happen.”

I’m Cristian, a Systems Engineering student specialized in software development and web architecture. I build scalable and efficient systems using PHP, MySQL, and the MVC pattern, applying clean code principles and solid requirements analysis. I transform manual processes into automated solutions that increase productivity and deliver real value to users and organizations.

I’m currently working on projects that integrate backend logic with optimized user experiences, always focused on performance and maintainability.

I’m ready to help your company optimize processes and improve results with technology. Would you like me to show you how?
